

### Teacher's Notes:

Colored copies of mascots 龍哥哥 and 龍妹妹 can be cut out, laminated and attached to a pointer or a ruler to be used in large group instruction. Students can also make their own hand puppets of the mascots to be used when practicing dialogues with a partner. To make a hand puppet: make black and white copies of the mascots, attach a sheet of paper to the back of the mascot and staple it together on the sides and top inside the cut lines. Students can then color and cut out their puppets. Using puppets will make speaking activities more lively and interesting. The use of puppets may also help students who are shy or self-conscious to gain more confidence in public speaking.
